

## Life Science Caucus Membership Commitment

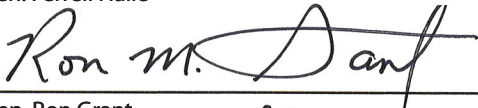

Tennessee's **Life Science Caucus** is committed to learning from **state and national industry experts** regarding policies that will support the growth of the life science industry in the state.

The goals of the Life Science Caucus are to:

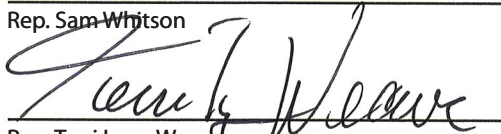

- Develop a sound knowledge of Tennessee's life science industry, including biotechnology, medical device, diagnostics, pharmaceuticals, academic research and health IT,
- Learn about the policies and regulations that affect the life science industry with a focus on supporting a favorable environment that will allow for further industry growth in Tennessee,
- Support the further education and dialogue between policymakers, industry, academia, patient groups and the general public,
- Ultimately, be a part of an effort to attract more jobs and investment to Tennessee by providing a favorable economic and political climate for life science industry growth.

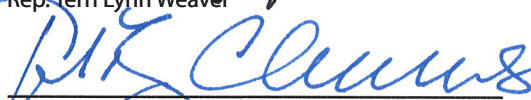

I commit to being a part of the **Life Science Caucus** inaugural membership.

  
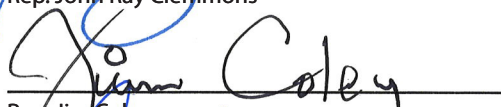

Sen. Ferrell Haile
